

EVALUASI PURNA HUNI RUMAH SEMENTARA PASCA GEMPA DI GANTIWARNO DAN WEDI, KABUPATEN KLATEN, JAWA TENGAH¹

Titi Handayani, Dwi Wahjoeni, Adi Wibowo²

Abstract : *The research's objective is to evaluate building performance of temporary shelters (TS) built post earthquake in 2006 in Klaten, Central Java. The research uses descriptive-qualitative method. The resulted are: 1) 37,5% TS is still in orginal condition; 2)37,5% TS were changed; and 3)25% TS is totally demolished because some owners needs to make their haouses better. It is hopedthat the research to develop the alternatives designs of temporary shelters for disaster in indonesia.*

Keywords: Post occupancy evaluation, post earthquake temporary shelter
